

ENow launches Compass- New Active Directory Management Solution

Los Angeles, CA - August 18, 2011 - ENow, a Microsoft Gold Certified Partner specializing in infrastructure consulting and development of software to simplify Microsoft system management, announced the much anticipated launch of Compass, a new [Microsoft Active Directory Management solution](#).

ENow's Compass is designed to help organizations proactively [monitor their Active Directory infrastructure](#), including replication monitoring and verifying DNS configuration. Compass includes a suite of reports that ensure the critical resources of an organization are adequately protected. The robust reporting capabilities were designed to save time when preparing for an IT audits.

The word 'COMPASS' is written in a bold, black, sans-serif font. The letter 'O' is replaced by a circular icon of a compass rose with a red needle pointing towards the top-right.

Compass is built on top of the award winning One Look management platform which features a customizable dashboard with red, yellow, and green lights indicating the health of each monitored server. The One Look solution enables IT support staff to proactively monitor servers in real time. In addition, ENow's management platform is also popular for its customizable reporting, which gives administrators complete flexibility in not only how they create reports, but also how they disseminate the information. "Traditional reporting products only allow you to email a report, resulting in static data," explains Jay Gundotra, CEO of ENow. "But with Compass Personalized Dashboards, each key role in your organization can have access to a customized dashboard that meets their needs and automatically updates." This unique feature empowers help desk personnel to better service their users and improve response time.

"After the success of Mailscape, our Exchange Monitoring and Reporting product, we have an international customer base spanning 27 countries. These companies expressed a strong interest in having us to replicate our approach for Active Directory," states Jay. "Compass was created with the same core ingredients, comprehensive monitoring and reporting features combined with our personalized dashboards. This approach provides Help Desk operators with the ability to quickly

diagnose a problem and deliver critical information needed to proactively manage Active Directory and avoid costly downtime.”
